

H1N1 Flu Virus (Human Swine Influenza) Information Resources

(last updated June 24th, 2009 at 5pm)

Overview

- Confirmed cases in Ontario as of **June 22**: 2,665 (2 deaths)
 - The province is moving away from daily reporting of confirmed cases of the H1N1 flu virus to a new reporting approach similar to that used during the regular flu season. Health officials will continue to monitor H1N1 flu activity, but will focus resources on enhanced surveillance and follow-up of severe cases and outbreaks. **A report on H1N1 and seasonal flu activity will be produced every Friday.**
- Confirmed cases in Canada as of **June 22**: 6,457 (incl. 15 deaths)
- Confirmed cases worldwide as of **June 24**: 55,867 (incl. 238 deaths)
 - WHO pandemic level: 6

Upcoming

[JUNE 24] The Ontario Hospital Association presents [The Pandemic Influenza: Where are we now?](#). The primary goal of this conference is to provide healthcare facilities with the tools and information they need to be able to recognize and manage an influenza pandemic. Chaired by Dr. Mary Vearncombe. Topics to include: H1N1 scientific update, ethics, occupational health issues, preparing for a pandemic vaccine response, risk communication, public health measures, and lessons learned.

Ministry of Health and Long-Term Care (MOHLTC)

A report on H1N1 and seasonal flu activity will be produced every Friday.

[JUNE 24] News Release: Seven Deaths Now Associated With H1N1 Flu Virus in Ontario

Dr. Arlene King, Ontario's Chief Medical Officer of Health, has confirmed three additional deaths associated with the H1N1 flu virus since Monday, bringing the total number of deaths in Ontario to seven

Public Health Agency of Canada (PHAC)

[JUNE 22] As of June 22, 2009, a total of 6,457 laboratory-confirmed cases of H1N1 flu virus have been reported in all provinces and territories in Canada (see Table 1 below). To date, 404 hospitalizations and fifteen deaths have been reported among laboratory-confirmed cases.

Summary of laboratory-confirmed cases of H1N1 flu virus reported to the Public Health Agency of Canada, by the provinces and territories:

Province / Territory	New Confirmed Cases	Total Confirmed Cases	Total Deaths
British Columbia	12	221	0
Alberta	107	605	1
Saskatchewan	67	577	0
Manitoba	76	371	2
Ontario	137	2665	3
Quebec	311	1660	9
New Brunswick	1	4	0
Nova Scotia	6	104	0
Prince Edward Island	0	3	0
Newfoundland	4	7	0
Yukon	0	1	0
Northwest Territories	0	5	0
Nunavut	30	234	0
TOTAL	747	6457	15

European Centre for Disease Prevention and Control (ECDC) and European Society for Clinical Microbiology and Infectious Diseases

[JUNE 24] The cumulative number of cases in the EU and EFTA countries is now 4 844. Main developments in past 24 hours:

- 404 new cases were reported in EU and EFTA countries;
- 1845 new cases were reported from non-EU and EFTA countries;
- Eight countries worldwide have today reported their first cases;
- The total of fatal cases worldwide is 239;
- Ten new fatal cases have been reported by Australia (1), Argentina (7) and Mexico (2) since yesterday.

[POSTED JUNE 23, CREATED JUNE 17] Analysis of influenza A(H1N1)v individual data in EU and EEA/EFTA countries

- Individual data, allowing for epidemiological analysis, were reported on 879 confirmed cases of influenza A(H1N1)v infection by 22 EU, EEA and EFTA countries from 5 May to 17 June 2009.
- Travel-related cases account for half of the reported cases. The main areas to which cases had travelled were, in chronological order, Mexico, the USA and Europe.
- 70% of the cases are reported in children and young adults under 30 years old.
- The most frequent symptoms are respiratory. At least one gastro-intestinal symptom has been reported by 21% of cases.

Mapping Resources

[JUNE 17] From Science Daily

A Warwick Business School professor and one of the founders of global risks specialist, Maplecroft, has released three new maps and indices revealing the countries most at risk from an influenza pandemic.

The Influenza Pandemic Risk Index (IPRI) consists of three categories:

- Risk of Emergence
- Risk of Spread
- Capacity to Contain
